AHMED KHAN

Computer Science Undergraduate · Security Operations, Data Analytics & AI

Dubai, UAE · ahmedzakirkhan@gmail.com · linkedin.com/in/ahmedzakirkhan · ahmezk11.github.io

PROFESSIONAL SUMMARY

Computer Science undergraduate (BSc, Class of 2027) with four internships across security operations, data analytics and automation. Most recently a Security Operations Intern at Fresha, closing 184 fraud and account-takeover investigations and reconstructing over £90,000 of confirmed fraud end to end. Comfortable across digital forensics, SIEM triage, SQL data-warehouse analysis and Python automation.

EXPERIENCE

Security Operations Intern | Fresha

May 2026 – Jul 2026 · Remote

- Owned the full incident lifecycle — intake, forensic reconstruction, adversary attribution, containment and stakeholder hand-off — as a front-line analyst for a global marketplace platform serving 130,000+ partner businesses across 120+ countries.
- Triaged and closed **184 investigations** to a verdict: ~104 suspected or confirmed account takeovers, 26 payment-fraud cases and 37 verified phishing reports, covering over **£90,000** of fraudulent value.
- Reconstructed 10 confirmed takeovers end to end through data-warehouse forensics (login and session history, two-factor-authentication logs, contact-detail changes, payout and bank records), and ran containment via credential resets and session revocation.
- Tuned false-positive SIEM detection rules, correctly clearing 33 false positives, and linked isolated cases into organised fraud rings — contributing to 5 malicious domain takedowns and authoring evidence-grade forensic incident summaries for cross-team hand-off.

Intern — Skywards Data Analytics | Emirates

Jun 2024 – Aug 2024 · Dubai

- Designed and developed interactive dashboards for the Skywards Data Analytics team, and led delivery of the official glossary of Skywards terminology used across the team.

Intern | TechVista Systems

May 2024 – Jun 2024 · Dubai

- Built web scrapers in Python using BeautifulSoup and Scrapy, then cleaned, analysed and presented the resulting datasets with Pandas.

Intern — Application Developer | Alpha Data

Apr 2023 – Jul 2023 · Dubai

- Developed an automated email workflow for new order-win announcements; applied Joget and Snowflake certifications to improve project delivery efficiency.

EDUCATION

Bachelor of Science (BSc), Computer Science | Heriot-Watt University

2023 – 2027 · Dubai

- Elected **Class Representative three times** (Foundation Year, Year 1, Year 3). Relevant coursework: Discrete Mathematics, Foundations 1 & 2.

PROJECTS

- **Arabica Learn** — AI-powered app for conversational Arabic with mentor practice circles and dialect-specific paths; **Top 5 Finalist from 60+ teams** at the Youth Innovation Awards (Congress of Arabic & Creative Industries).
- **Where's My Money?** — AI personal-finance assistant answering plain-English questions about spending, built in a 48-hour Rabbitron Lab × Heriot-Watt hackathon.
- **MasterMind on Raspberry Pi** — code-breaking game in C and ARM Assembly driving an LCD, LEDs and button input through direct GPIO control.
